SUMMARY

To persue a job opertunity in a competitive environment that will challenge my boundaries and expand my knowledge in that particular field while allowing me to add values to the dynamics of the company.

SKILLS

| Programming Language | C | Core Java | Python |

| Web Development | HTML5 | CSS3 | Javascript |

| Framework | ReactJS | NodeJS |

| Database | MySQL |

| Software | Eclipse | Jupyter notebook | git | MS Word | MS Excel | MS PowerPoint |

EDUCATION

Master's of Science: Computer Science	MSCB University, Takhatpur	CGPA: 9.08	Oct 2020 - Aug 2022
Bachelor's of Science: Computer Science	M.P.C. auto college	CGPA: 8.03	Jul 2017 - Aug 2020
Intermediate of Science: Science	Vijayanjali +2 Sc. Res. College	73.16%	May 2015 - May 2017
Matriculation	M.P.K. Girl's High School	77.83%	Apr 2014 - Mar 2015

PROJECTS

A deep learning approach for identification of brain tumor   Apr 2022 - Aug 2022

I have created a binary classification model using tensorflow and deep-learning algorithm which can classify brain MRI images of patient and return yes if the subject has tumor otherwise returns no. In recent years the application of AI and ML has been increased exponentially in the Health Sector. In this projct the most challenging factor is to minimize the processing time and maxmize the rate of accuracy of prediction.

Portfolio website   Aug 2022 - Sep 2022

This is my personal portfolio website. I am an aspiring web developer and this website is for showcase my skills and project. I build this website using HTML5 and CSS3 and host it using netlify. Click here to see live.
